YAT INDUSTRIAL PARK.

Honesty / Innovation / Efficiency / Sharing
Committed To Be The Most
Professional Smart Tool Provider

A Modern Enterprise

Zhejiang YAT Electrical Appliance Co.,Ltd. was established in 2002, with a registered capital of 51 million US dollars. It has three production bases, located in Jiaxing, Zhejiang and Ningbo, Zhejiang and Monterey, Mexico. It has sales branches in Hangzhou, China, the United States, and the Europe. And now it has over 2000 employees, which is a modern manufacturing company mainly engaged in garden machinery, power tools, and smart tools.

Since its inception, YAT has been adhering to the business philosophy of "Innovating Quality Tools for a Better Life" and to "the world's most professional smart tool solution provider" as its corporate vision. And we are always regarding innovation as its core competitiveness and devoting itself to research and production of green energy-saving products, such as lithium battery technology, low-emission gasoline, hazardous substance control, waste recycling, etc. The company has a research and development team of nearly 200 people, and has obtained 94 invention patents and 380 utility model patents. At present, it has nearly one hundred first well-known international brand customers, as well as thousands of domestic terminal sales store partners.

COMMITTED TO BE THE MOST PROFESSIONAL SMART TOOL PROVIDER

Modernized Logistics Control Systems

With the integration of MES, WMS, ERP, warehouse automation, loading and unloading mechanization, packaging standardization, transport process networking and integration of processing and distribution, electronic utilization of system information management is realized. The operators, through a PDA, are guided by automatic input via an advanced information technology system resulting in the strategic realization of enterprise management data management and greater production automation.

Modernized Automated Production Systems

Oriented by production technology is transmitting, YAT is upgrading to merge "two integrations" production process automation and product information data. In result, YAT can create new assembly lines on its own initiative and adopt semi-automation and full-automation in some process. Now we have already used automated equipment for on-line inspection, assembly, packing and warehousing. It is important that improve the daily efficiency and support the production line to keep quality consistence. With this production information (MES) system going into use the overall assembly capacity is greatly improved.

From VOC (Voice of Customers) to CTQ (Critical to Quality)

Situation:
Challenge for inventive,
cutting-edge technology

Action:
Develop strategic
innovation plan

Result:
Delivery of state-
of-the-art tools,
machinery, and
robotics

Quality Control Recognition

In 2008, the YAT laboratory was authorized by third party certification agencies like TÜV-RH, TÜV-SÜD, ITS, CSA, etc. as a "witness laboratory". In 2010, the laboratory was awarded "National Laboratory" by the China National Accreditation Committee for conformity assessment. In 2011, the laboratory was awarded the "Zhejiang Export Inspection and Quarantine Laboratory Evaluation of Enterprise Certificate" by Zhejiang Import-Export Inspection and Quarantine Bureau, in fulfillment of testing on power tools, garden tools and gas products. The laboratory has the capability of performing numerous tests on power tools, garden tools, chain saws and gasoline mowers to include: rise, safety, life, salt spray, environmental, EMC, and emissions testing.

18V MAX Battery & Charger

Intelligent Charging Technology

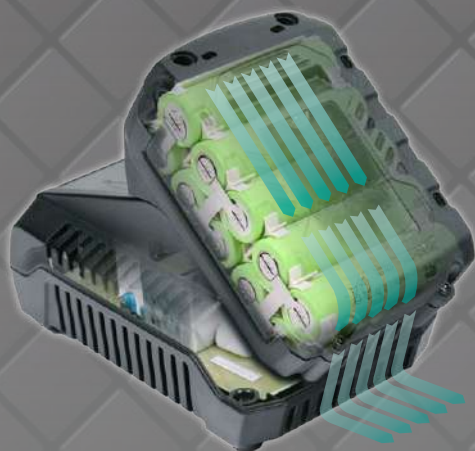

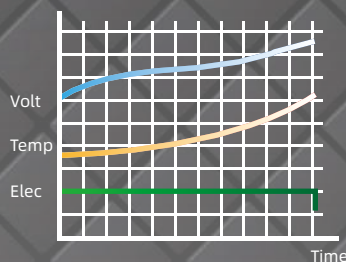

- When the temperature of lithium battery is high, it is necessary to cool the battery before charging. The built-in cooling fan of Yat charger, in the process of charging and charging, the air circulation always flows through the lithium battery, so that the lithium battery is cooled and charged quickly, thus greatly shortening the charging time.
- During the whole charging process, the charger designed by Yat has a built-in chip communication in the battery pack, which actively controls the current, voltage and temperature to extend the service life of the battery.
- After using the battery pack, the temperature is high, the battery pack must be cooled before charging, Yat charging technology, built-in cooling fan, can quickly cool the battery, shorten the battery charging time, while cooling, while charging, so as to improve the charging speed of the battery.

SENIX Charging Technology

Regular Charging Technology

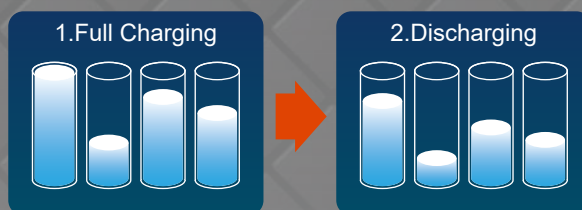

Battery Protection Function

- Battery protection function to increase life: overload protection, overdischarge protection, overheat protection, overcharge protection.
- Allows tools to detect the condition of the battery pack in real time and exchange data to prevent overload, overdischarge and overheating.
- Balanced charging: the capacity of the unit battery is balanced, ① the capacity of each unit battery pack is balanced, will not produce discharge or overcharging, ② extend the use time of the battery pack, because each unit battery discharge is uniform.

20V MAX Battery & Charger

Brushless Motor Technology

- +25%** Power increase by 25%
- +50%** Working time increased by 50%
- +150%** Life time increased by 150%

- No carbon brush, no maintenance needed.
- Brushless motor makes the battery products work longer.
- No power loss due to friction during operation, and it reduces the generation of heat, the motor efficiency can be increased by 25%.
- The life time of brushless motor is greatly improved, which is very suitable for long-term continuous use.

Chain Saw

- 4 Cycle Engine with pure gasoline, No mixing of gas and oil, more convenient refueling.
- New Technology -4QL" 4 Cycle Engine Quantitative One-Way Lubrication for Low Emission.
- Side-mounted chain tensioner makes chain adjustment quick and easily.
- Available 360 degree rotation without engine stall and fuel leakage.
- U type front handle to provide the horizontal and vertical cutting position.
- Auto Choke Function Primer engineered for efficient cold starting.
